QUALITY CUTTING TOOLS

An ISO 9001:2015 Certified Company

Company Profile

At Trucut Tool, we take great pride to introduce the Domestic and International market, a comprehensive range of Solid Carbide Rotating Tools.

We at Trucut believe that in this fierce competitive world where top notch quality will be an ultimate goal, we use High Grade Microfine and Ultra Fine Grade carbide rods imported from Europe.

All Tools are produced on latest 5 Axis CNC Tool Grinding Machine and inspected on CNC Inspection to ensure that tool manufactured at Trucut reaches the end users with consistent quality and tight tolerance.

We are extremely proud and confident that our quality and product line will meet all your requirements and end users will enjoy using our Quality products as we enjoy producing it...

Manufacturing Facilities

Microfine and Ultrafine Carbide Raw Materials and Hss-Co are imported from Europe to ensure consistent quality

In-house forming section from un-ground carbide blanks

CNC 5 Axis and 7 Axis Grinding Machines for consistent tool performance

Non contact 5 Axis CMM Tool Inspection Machine for consistent Geometry and Dimension

Laser marking for permanent identification

High quality Single Piece packing used for best Tools protection

SOLID CARBIDE

HYPERLine®

- For High Feed & Speed Machining
- For machining Alloy Steel & Super Alloys like Stainless Steel, Inconel Etc
- Made From Ultra -Fine Carbide
- Smooth Coat For Better Wear Resistance & Chip Flow

HARDLine®

- High Speed Machining Application
- For Machining of High Hardened Material Upto 62 HRC
- Wide Range & Series to Suit Die & Mould Industry
- Made From Submicron Grade Carbide with High Cobalt
- Hard Coat For Better Wear Resistance at High Speed Finishing Application

SOFTLine

- High Speed Machining of Non- Ferrous
- High Helix - Sharp Edge Design
- Made from Micro Grain Carbide
- Smooth Grind For Better Chip Flow
- Recommended for Aluminium Machining

TRULine®

- Wide Machining Application at Moderate Cutting Condition
- For Machining Steel /Cast Iron/Alloy Steel Upto 40 HRC
- Made From Ultra Fine carbide
- Smooth Coat for Better Wear Resistance & Chip Flow

SOLID CARBIDE

CMTLine

- Custom Made Tools
- Designed & Built For Specific Application

PCDLine

- PCD Reamer
- PCD Cutter
- PCD Drills
- PCD Custom Made Tools

Hss-Co Drilling Solution

-  Jobber Drills
-  Long Drills
-  Ex-Long Drills
-  Worm Pattern / Paraboloid Fluted Drills
-  Centre Drills

Hss-Co Milling Solution

- | | |
|----------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
|  End Mill Cutters |  Woodruff Key Slot Cutters |
|  Roughing End Mills |  Dove Tail Cutters |
|  Counter Sink Cutters |  Hole Mills |
|  Counter Bore Cutters |  Tapered Die Sinking Cutters |
|  T-Slot Cutters | |

Hss-Co Reaming Solution

- Hand Reamers
- Machine Reamers
- Machine Reamers -Extra Long
- Chucking Reamers
- Machine Jig Reamers
- Taper Pin Reamers
- Hole Mills
- Taper Reamers
- Shell Reamers

Hss-Co Drilling Solution for Large & Deep Hole

- Spade Drills -Hss-Co / PM
- Spade Drill Body -Spiral Fluted
- Spade Drill Body -Helical Fluted
- Spade Drill with Internal Coolant Supply
- Coolant Ring
